

# 100MWh Energy Storage Project

## Overview

---

How many kWh can a 50 mw/100 MWh energy storage project store?

Developed and managed by Datang Hubei Energy Development, the 50MW/100MWh energy storage project can store 100,000 kWh of electricity on a single charge, supplying power to approximately 12,000 households for an entire day. In a bid to diversify from lithium, China has been exploring alternative energy storage technologies.

Where is a 100 MWh energy storage station in China?

(A 100 MWh-scale energy storage station using sodium-ion batteries went into operation on June 30, 2024 in Hubei, central China. Image credit: Hina Battery) China has seen another energy storage project using sodium-ion batteries go into operation, as the new batteries begin to gain wider use in energy storage.

What is a 200 MWh energy storage station?

The energy storage station is the first phase of a 200-MWh project and consists of 42 battery bays. It can store 100,000 kWh of electricity on a single charge, releasing power during peak periods to meet the needs of about 12,000 households for a day and reducing CO2 emissions by 13,000 tons per year, according to Hina Battery.

Where is Datang Group's 100 mw/200 MWh sodium-ion energy storage project located?

The first phase of Datang Group's 100 MW/200 MWh sodium-ion energy storage project in Qianjiang, Hubei Province, was connected to the grid. From pv magazine ESS News site

## 100MWh Energy Storage Project
