

100kWh Greek Mobile Energy Storage Container for Rural Use

Overview

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);.

What is a 100 kWh battery system?

A 100 kWh battery system is a large-scale energy storage solution capable of storing and delivering 100 kilowatt-hours of power. It consists of several components: Battery Cells: The fundamental units that store and release electrical energy. These cells can be of different types, such as lithium-ion, lead-acid, or flow batteries.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
