

# **10MW London Solar Containerized Cement Plant**

## Overview

---

This work describes the implementation of concentrated solar energy for the calcination process in cement production. Approach used for providing solar energy includes the utilisation of a solar tower sy.

Can a solar power system save CO<sub>2</sub> in cement industry?

Concentrated solar power system is designed for cement industry. Substitution of required thermal energy ranging from 100% to 50% is studied. 7600 heliostats with 570 ha land required for 50% conventional energy replacement with solar energy. Selected conventional cement plant could save 419 thousand tons of CO<sub>2</sub> annually.

How can solar energy help cement production?

Growth in cement production consumes a considerable amount of coal for fulfilling the thermal energy requirement which ultimately produces a lot of greenhouse gases to the atmosphere. So, there must be some renewable sources of energy like solar energy which can fulfill the thermal energy needs for cement production.

How to integrate CST Technology in a conventional cement plant?

Best approach to integrating the CST technology in a conventional cement plant is to use solar tower system with solar reactor at the top of the solar tower or preheater tower. Additionally, the use of non-conventional sources of energy in cement production reduces a lot of anthropogenic emissions to the atmosphere.

Which cement plant is used for solar thermal application?

Location and DNI availability of the investigated plant A conventional cement plant (Kotputli Cement Works (KCW), an UltraTech Cement Limited manufacturing unit) at Kotputli, Jaipur, Rajasthan, was investigated for solar thermal application.

## 10MW London Solar Containerized Cement Plant

---

CEMEX and Synhelion achieve breakthrough ...

Feb 2, 2022 · CEMEX and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, ...

---

Inside The World's Largest Cement Decarbonisation Project

Jul 10, 2025 · What is the impact? The UK government hails the Peak Cluster project as the world's largest cement decarbonisation effort, projecting the creation of 300 permanent ...

---

Producing cement with solar energy

Mar 2, 2022 · This is where the CemSol project comes in, short for "solar production of cement with integrated CO<sub>2</sub> capture". The team of scientists is developing a process in which the ...

---

Synhelion and CEMEX make further progress ...

Aug 4, 2023 · Synhelion and Cemex will now take further steps toward building a solar-driven industrial-scale pilot cement plant. "I am convinced ...

---

Multiplex powers up 10MWp solar farm in Norfolk following ...

Mar 26, 2025 · Multiplex is the first and only contractor in the UK with its own solar farm and, from 1 April 2025, four major construction projects it is delivering in Central London - including New ...
