

# 10kw vanadium battery energy storage

## Overview

---

What is a vanadium ion battery?

With the aim to address these challenges, we herein present the vanadium ion battery (VIB), an advanced energy storage technology tailored to meet the stringent demands of large-scale ESS applications. The VIB is based on an advanced electrochemical framework integrating all-vanadium chemistry with a streamlined cell architecture.

What are vanadium redox flow batteries (VRFBs)?

Vanadium redox flow batteries (VRFBs), widely researched as an alternative for large-scale applications, provide a number of benefits including safety and long cycle life.

What is a aqueous vanadium ion battery (VIB)?

First real-world demonstration of aqueous vanadium ion battery (VIB).  
Maintains over 99 % of initial capacity over 12,000 cycles at 20 C-rate.  
Achieved 98.1 % round-trip energy efficiency at 1 C-rate. Enables safe and reversible full discharge to 0 V without degradation.

What is a high-purity vanadium liquid electrode?

A high-purity vanadium liquid electrode (Lotte Chemical Co., Ltd.) was used, consisting of 1.7 M vanadium dissolved in 4.2 M sulfuric acid. This formulation aligns with standard formulations widely adopted in the VRFB field, enabling meaningful comparison.
