

# 120kW Photovoltaic Container for Emergency Command

## Overview

---

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

How long does it take to install a solar panel container?

Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel unit for quick installation. Folding solar panel inside the container can be unfolded or stowed in as little as 1h ( the time does not vary for different photovoltaic containers ).

How long does it take to ship a solar container?

Standard solar container models can be manufactured and ready to ship in as little as 4-6 weeks. Customized configurations can take up to 8-10 weeks, with shipping times varying by destination. Do you offer after-sales support for mobile solar PV containers?

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.
