## Overview

---

What is a 12V power inverter?

Power inverters with more than 90% conversion efficiency and stable performance. The 12V power inverter has the functions of current protection, short circuit protection, over-voltage protection, reverse charging protection, power protection, and core protection.

What are the two types of 12V inverters?

There are two main types of 12V inverters: sine and pure sine. Sine inverters produce a blocky signal, while pure sine inverters generate a wavy signal. Pure sine inverters are considered the best 12V inverter models because they produce a cleaner signal, which is better for expensive laptop and camera batteries.

How much power does the KP1500 inverter supply?

The KP1500 pure sine wave power inverter supplies 1500 watts of continuous pure sine power and 3000 watts of peak power. It converts 12V DC to 120V AC power.

What is a 12V DC to 220V battery charger used for?

Converts 12v DC to 220v AC, 200 Watt output Overload protection, Low battery protection, Battery reverse connection protection Use for Color TV, CFL, DTH, DVD and Mobile charger Inbuilt output point of 2 USB for mobile charging output 5.5v DC NOTE: IT CAN`T BE USED FOR BATTERY CHARGING. It converts 12v DC to 220v AC.
