16kw sunsynk inverter factory in Mumbai

Overview

What is a sunsynk Max 16kw inverter?

The Sunsynk MAX 16kW is a low voltage (48V) hybrid inverter suitable for off-grid, grid support, back-up and self-consumption PV systems. Moreover, the inverter can also be used in both three-phase and single phase parallel applications. The largest single-phase hybrid Inverter on the market.

What is a sunsynk Max single phase inverter?

Experience a groundbreaking shift in power management with the Sunsynk MAX Single Phase Inverter, the world's most potent low-voltage inverter boasting an extraordinary maximum output power of 16kW and a rapid 300A battery charge current.

How efficient is a sunsynk inverter?

The CT coil measures the power and the inverter will reduce power when too much power is detected going to the grid. Even better, if the Sunsynk inverter only has 2000W of excess solar, the element will receive the other 200W from the grid. So it is efficient.

Can a sunsynk inverter handle a 4 kW load?

Going through the various parts of the HF design, I can also think of reasons why it is likely easier to optimise there and get higher efficiency whereas LF design is somewhat fixed on what it can do. Simple answer is yes, the 5.5 kW or 8.8 kW Sunsynk inverter will easily handle your load (4 kW) without problems for long periods of time.
