How much power can a 20kW wind turbine generate?

When the wind speed reaches 11m/s, it can generate 20kW of power. But the wind speed is not 11m/s all the time, so we calculate the average wind speed. With an average wind speed of 5m/s, a 20kw wind turbine can generate 120kwh per day. What should I do if the wind speed is not enough?

You may consider using a 20kw wind-solar hybrid system.

What is a 15kW wind turbine?
