# 21700 solar container lithium battery cell assembly 60v40a

## Overview

---

### What is a 21700 battery?

A 21700 battery is a high-capacity, rechargeable lithium-ion cell designed for superior energy efficiency and performance. With a standard size of 21mm in diameter and 70mm in length, these batteries were developed as a next-generation improvement over 18650 cells, offering increased power output, extended runtime, and higher energy density.

### Are 21700 batteries safe?

Unprotected 21700 batteries: Lack built-in safety features and are generally used in battery packs with external battery management systems (BMS). 21700 batteries are widely used in: Electric vehicles, with companies like Tesla and other manufacturers using them in battery packs for improved energy storage and performance.

### What is an unprotected 21700 battery?

Unprotected 21700 Batteries: Designed for battery packs or high-performance applications where external battery management systems (BMS) handle protection. 21700 batteries are becoming the industry standard for devices requiring longer runtime and more power. Some common applications include:.

### What is the difference between 18650 and 21700 lithium-ion batteries?

Compared to 18650 batteries, these 21700 batteries are known for their higher energy density, large size, and power output. They are friendly to the environment and earth and can be reused many times. Why Choose the Sunpower 21700 lithium-ion battery?
