## Overview

---

What is a 24V inverter?

Built with truckers and professional drivers in mind, our 24V inverters are compact, lightweight, and quiet in operation. Once connected to your battery, you get a stable and reliable power supply from the output socket ready to handle everything from small electronics to higher-wattage appliances, depending on the model you choose.

What is a genetry solar inverter?

Genetry Solar inverters are designed to meet the varied needs of the off-grid customer who knows exactly how they want their system to work. There are literally hundreds of settings, allowing complete control over the inverter's behavior. Many features are actually the result of customer requests!.

Does genetry solar inverter switch from 240V to 120V?

This is a highly valuable feature for RV customers who may go from a 240v shore connection one day to Grandma's 120v extension cord the next day! No external hardware is required: a split-phase output Genetry Solar inverter will automatically switch between 120v input or 240v input as needed!.

Are genetry solar inverters white-labeled?

Genetry Solar inverters are completely designed in-house by Genetry Solar in the U.S.A.; they are not "white-labeled" (rebranded) products designed by a different company. This means that we are able to provide literally unparalleled technical support, not to mention providing features not found anywhere else in the low-frequency inverter market.
