

# **25kW Mobile Energy Storage Container Product Specifications**

## Overview

---

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);.

How many mw can a battery energy storage system handle?

the load when needed, reducing the use of diesel generators. The battery energy storage system can also be used continuously to .6 MWh1.1 MW / 1.2 MWhBattery warran ISO container. 2590 mm and other high humidity/corrosive applicationsFire alarmIncluded as standa.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

## 25kW Mobile Energy Storage Container Product Specifications
