

3 7v solar container lithium battery pack

Overview

What are ionic lithium ion deep cycle batteries?

Features of ionic Lithium-ion Deep Cycle Batteries: Light weight, up to 80% less than a conventional, comparable energy storage lead-acid battery. Lasts 300-400% longer than lead-acid. Lower shelf discharge rate (2% vs. 5-8% /month). Drop-in replacement for your OEM battery. Expected 8-10 years of battery life.

What are the advantages of 18650 lithium ion battery pack?

18650 lithium ion battery pack has low internal resistance and high flat voltage characteristics during strong current discharge, which ensures a wider application field. Provide long storage life with few limiting conditions. It offers problem-free charge after long storage, permitting to use in a wide range of applications. Max.

What is a rechargeable lithium ion cell?

Rechargeable Lithium Ion cells have a negative electrode (anode) made from lithium compounds. Lithium is a highly reactive material and is much lighter than the hydrogen-absorbing metal alloy of the NiMH negative electrode. This leads to higher gravimetric energy densities for the Li-Ion cell.

What is a lithium ion battery?

A. Lithium-ion batteries are rechargeable batteries in which lithium ions move from the anode to the cathode during discharging and back when charging. They are popular batteries for use in consumer electronics because they provide high energy density, possess no memory effect and have a slow loss of charge when not in use.
