

300wh power station in China in Croatia

Overview

Who owns a power station in Croatia?

All power stations in Croatia are owned and operated by Hrvatska elektroprivreda (HEP), the national power company. As of 2015, HEP operates 26 hydroelectric, 4 thermal and 3 cogenerating power plants with the total installed electrical power of 3.654 MW.

Why are solar projects growing in Croatia?

The government's commitment to a favorable investment climate has been a critical driver of this growth. Incentives such as feed-in tariffs, tax breaks, and subsidies for solar projects are designed to attract more investors and developers to the Croatian solar market.

Will Croatia get 1 GW of solar power by 2025?

Croatia is on pace to surpass 1 GW of solar power by 2025, thanks to a surge in installations and supportive government policies. This growth is part of the country's broader commitment to renewable energy and aligns with EU targets to boost the share of renewables in electricity generation.

Why is solar power important in Croatia?

The growth of solar power in Croatia is also creating new economic opportunities. The renewable energy sector can generate jobs in manufacturing, installation, and maintenance, while the increased use of solar power can lead to significant cost savings for consumers and businesses through lower electricity bills.
