

300wh power station in China in Mozambique

Overview

Does Mozambique have a high energy demand?

Mozambique's domestic energy demand is increasing steadily and is expected to continue rising as the country industrializes. The Southern African Development Community (SADC) member countries are expected to have higher demand for power that could be met with Mozambican exports.

Will Mozambique become a regional hub for electricity production?

In July 2019, The Mozambican government approved the terms and conditions for a 2000 MW gas-fired power station. The plant is part efforts to turn Mozambique into a regional hub for the production and supply of electricity, implementing the integrated electricity master plan, which envisions the production of 8,000 megawatts by 2043.

Does Mozambique have a major energy transition strategy?

Across Mozambique there are significant hydro, solar and wind growth plans, particularly in the north of the country. The strengthening of the Northern grid will enable greater penetration of renewables in Mozambique over time. The country's President, Felipe Nyusi recently announced a major energy transition strategy at the COP28 summit in Dubai.

Why is Mozambique a major energy exporter?

Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) – South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities.
