

# **30kW Off-Grid Solar Container for Cement Plants**

## Overview

---

What is a solar power generator?

A silent, worry-free alternative to loud and dirty diesel generators to meet high off-grid power needs using solar power generation – with optional wind turbine (s) for augmented power generation day and night. Harvested power stored in a choice of batteries including Lithium Ion, EV Second Life Batteries, and deep-cycle AGM batteries.

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

Which solar panels do you use?

We use the highest quality solar panels, including LG, Peimar, and Canadian Solar; these solar panels harvest the sun's power and stores the energy in high-quality lithium batteries, controlled with an external BMS. Then the power is distributed using Victron Multiplus units, so this inverter/charger can transfer the power.

Do tanfon solar DC combiner boxes have overload safety functions?

A: First of all, Tanfon Solar DC combiner boxes, inverters, and different gear strains have overload safety functions. When atypical voltages such as lightning strikes and leakage occur, they will routinely become off and disconnected, so there is no protection problem.
