

# 5G base station construction accelerates communication technology

## Overview

---

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

What are 5G base stations?

Conferences > 2023 8th Asia Conference on P. As a key technology of the fifth-generation communication technology, 5G base stations bring high-speed communication and high electricity costs.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

How many 5G base stations are there in India?

Citing that the country has built a staggering 4.19 million 5G base stations, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.
