

# **600kW Solar Containerized Wastewater Treatment Plant in Ghana**

## Overview

---

What is the Kumasi wastewater treatment plant?

This project is a significant milestone for both the Hungarian and Ghanaian sides, as this is the country's first water industry development using Hungarian technology. The Kumasi Wastewater Treatment Plant was designed and built by the Pureco-Unit Consortium for one of Ghana's largest private groups, the Jospong Group of Companies.

What is Gama sanitation & water project?

Under the Greater Accra Metropolitan Area (GAMA) Sanitation and Water Project, conceived as one of the pro-poor interventions to ensure the policy of "One-House-One-Toilet" is delivered across the Metropolitan Area, he stated that the project has delivered 48,641 improved household toilets, which have benefitted 389,128 people as at December 2020.

What is the first Hungarian-Ghanaian wastewater treatment project?

The first Hungarian-Ghanaian wastewater treatment project is a huge professional success for the Pureco-Unit Consortium. He was really pleased that the development improves the quality of daily life of people in Kumasi.

What is the greater Kumasi project?

Component One of the Greater Kumasi Project, he added, will extend potable water by laying 120kms of pipelines, provide 5,000 new service connections, establish telemetry and also retool the Ghana Water Company's metre shop to reduce non-revenue water.
