

## **64V to 24V inverter**

## Overview

---

Where can I buy a 24 volt inverter?

Shop now at RoadKing and get the power you need wherever your journey takes you. A range of 24v to 240v mains inverters including power, soft start & pure sine wave 24 volt inverters, Shop for a Waeco, Skytronic or RoadKing 24v inverter.

What does a 24V battery inverter do?

A 24V battery inverter is a device that converts 24V battery output (DC, or direct current) into 230V mains output required for domestic appliances (AC, or alternating current). It can also function as a backup / emergency power source in case of power cuts.

How much power does a 24V inverter consume?

A good sized 24V inverter could use about as much power just being on as your lights do. If the lights consume 45 watts and run for 12 hours a day, the total power usage would be  $45 \text{ watts} \times 12 \text{ hours} = 540 \text{ watts}$ . The battery power required for losses plus the load could double that. The lights themselves may be DC, using a small transformer (wall wart) to go from 120Vac to (likely) 12Vdc.

How do I choose the right 24V inverter?

Choose the right 24V inverter by adding up the wattage of the devices you want to run, then match it with one of our models. Shop now at RoadKing and get the power you need wherever your journey takes you.
