

# ASEAN cylindrical 4680 solar container lithium battery

## Overview

---

What is a 4680 battery?

The 4680 battery is a new kind of cylindrical lithium-ion battery that is designed to power electric vehicles. It gets its name from its dimensions—46 millimeters in diameter and 80 millimeters in height. This larger size allows it to store more energy and handle more heat, making it ideal for high-performance applications.

Can a 4680 battery change market dynamics?

Almost all major battery makers including the Korean trio – LG Energy Solution Ltd., SK On Co. and Samsung SDI Co. – are working to produce in large quantities but no company has yet claimed to have done so. “The 4680 battery is a weapon with which you can change the market dynamics,” he said.

Will 4680 batteries be made in 2025?

SK On, a unit of Korea’s top energy firm SK Innovation Co., is operating a task force to develop its own 4680 batteries under the direct leadership of its chief executive. Japan’s Panasonic Holdings Corp., which previously said it would begin producing 4680 batteries this year, is now looking to 2025 as its target year for mass production.

Can a 4680 battery change Tesla's market dynamics?

“The 4680 battery is a weapon with which you can change the market dynamics,” he said. Earlier this year, LG Energy Chief Executive Kim Dong-myung said the company aims to begin mass production of larger format cylindrical cells used by Tesla Inc. as early as August.

## ASEAN cylindrical 4680 solar container lithium battery
