After-sales service for 50kW folding container used in oil refineries

Overview

What services do we provide for crude oil refinery equipment?

We provide comprehensive engineering, procurement, and fabrication services for modular crude oil refinery equipment. With ASME Code Stamps "U" and "R" and an approved quality control program, we ensure superior performance and reliability.

Why should you choose AmeriSource for a mini crude oil refinery?

As pioneers in mini crude oil refineries, Amerisource delivers these refineries in prefabricated modules, making installation more cost-effective and time-efficient. We provide comprehensive engineering, procurement, and fabrication services for modular crude oil refinery equipment.

What is a modular refinery?

This ensures prompt and efficient setup at your location to produce various fuels such as gasoline, diesel, jet fuel, kerosene, marine diesel oil, fuel oil, and liquefied petroleum gas. Modular refineries are custom built to clients specifications. Clients can choose to construct single train modular refineries from 500 bpd to 30,000 bpd.

What are modular crude oil refineries?

Modular crude oil refineries are prefabricated processing plants designed to distill crude oil into a range of petroleum products, including naphtha, kerosene, diesel, residual fuel oil, and off-gas.
