

# **Asian container solar energy storage project**

## Overview

---

What is a containerised battery energy storage system (cbess)?

This operates off-grid. The first and largest containerised battery energy storage system (CBESS) for solar power has been launched in Indonesia. In a statement, SUN Energy said the project is located at PT Cipta Kridatama Jambi and has a capacity of 643.8 kilowatt-peak. It has a 1 megawatt-hour battery storage system housed in a 20-foot container.

Which countries are deploying a battery energy storage system (Bess) in 2025?

Spanning Australia, Japan, Southeast Asia and South Asia, these deployments represent a substantial contribution to 16 GWh of new Battery Energy Storage System (BESS) capacity projected to be added in APAC (excluding China) in 2025, according to BloombergNEF.

Where is cbess solar project located?

In a statement, SUN Energy said the project is located at PT Cipta Kridatama Jambi and has a capacity of 643.8 kilowatt-peak. It has a 1 megawatt-hour battery storage system housed in a 20-foot container. The CBESS solar energy system operates off-grid, making it independent of the national electricity grid.

Why is Trina storage growing in Asia Pacific?

“Our growing presence across APAC reflects not only strong market demand but growing recognition of Trina Storage's differentiated technology, delivery capabilities, and long-term reliability,” said Dr Leo Zhao, Head of Energy Storage at Trinasolar Asia Pacific.
