

Austria Off-Grid Solar Container 20kW

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Who is solarcont GmbH?

SolarCont GmbH was created through a cooperation between the two successful companies Hilber Solar GmbH from beautiful Tyrol and the company Gföllner Fahrzeugbau und Containertechnik GmbH, which is deeply rooted in Upper Austria. This cooperation makes it possible to develop a completely new type of mobile solar system.

How many solar modules can be stored in a container?

The container measures 6 meters x 2.4 meters x 2.9 meters and weighs 20 tons. It consists of 240 solar modules placed on a folding system that can be removed and stored. The system has a capacity of up to 140 kW and can extend over a total length of 120 meters (60 meters per side). The result is a maximum possible solar area of around 720 m².

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
