# BESS Asia rooftop solar panels

## Overview

---

Blue Whale Energy and UNIGRID, Inc. have partnered to deploy rooftop solar-linked battery energy storage systems (BESS) in support of a virtual power plant (VPP) network across Southeast Asia. What is a Bess Solar System?

BESS are often found in stand-alone systems and increasingly in grid-connected systems to provide backup power, peak shaving, energy arbitrage, ancillary services, demand response, and microgrid. Based on installation location, PV systems can be ground-mounted, floating, or rooftop.

What are the electrical safety standards for rooftop PV & Bess installations in ASEAN?

Standard Guideline-Enhancing Electrical Safety Standards for Rooftop PV and BESS Installations in ASEAN through Safety Features Application xi Li-ionLithium-ion LFPLithium Iron Phosphate LOTOLockout/Tagout LVLow Voltage MCCBMoulded Case Circuit Breaker MEAMetropolitan Electricity Authority (Thailand).

Why should you choose a rooftop PV & Bess system?

4. The rooftop PV + BESS can provide a diverse range of services and quickly respond to grid requirements. Technological advancements have also improved the scalability of energy storage systems. Thus, the BESS can be an essential grid element, contributing to system reliability and flexibility.

What is the cost-benefit analysis for Bess & rooftop PV combined?

The cost-benefit analysis has been carried out based on the following primary benefits to C&I consumers considering BESS and rooftop PV combined and BESS without a PV system. The PV and BESS will operate behind the meter in tandem with the grid power supply system and DG power supply when there is a grid outage.
