

# **Battery cabinet deployment in the capital**

## Overview

---

Will Tesla build a grid-scale battery energy storage station in China?

Tesla has officially signed a ¥4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.

Will China add 5 gigawatts of battery-powered storage by 2025?

This project will support Beijing's national goal of adding 5 gigawatts of battery-powered storage by the end of 2025, boosting China's total capacity to 40 GW. In addition, the move is strategically significant for Tesla.

How much power does a battery storage system have in 2023?

Capacity for global battery energy storage systems rose 42 gigawatts in 2023, nearly doubling the total increase in capacity observed in the previous year, according to the International Energy Agency. — CNBC's Arjun Kharpal contributed reporting.

How will China's new battery power plant work?

The company added that the power plant will “effectively solve the pressure of urban power supply and ensure the safe, stable and efficient electricity demand of the city.” This project will support Beijing's national goal of adding 5 gigawatts of battery-powered storage by the end of 2025, boosting China's total capacity to 40 GW.
