# Battery cabinet line station cabinet

## Overview

---

What are the safety storage cabinets for lithium-ion batteries?

Safety storage cabinets for passive or active storage of lithium-ion batteries according to EN 14470-1 and EN 1363-1 with a fire resistance of 90 minutes (type 90) — fire protection from the outside-in and from the inside-out.

What is a lithium-ion battery cabinet?

The cabinet's key risk control measures include temperature regulation, in the form of natural and/or mechanical ventilation systems, that help keep the lithium-ion batteries cool and dry while they're charging and in storage. Battery cabinets are a type of safety cabinet specifically constructed for lithium-ion batteries.

What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

How do I choose a battery storage cabinet?

No matter what safety level you choose, all cabinets offer these key safety features: If you only wish to store batteries in the cabinet, choose the STORE version. If you intend to charge (active storage) batteries directly in the cabinet, then choose the CHARGE version.
