## Overview

---

What is a mobile solar container system?

The mobile solar container system includes solar panels, storage batteries, inverter, mounting brackets, and accessories. Solar panels collect energy from the sun and store it in the battery bank, and the inverter converts it to AC power for use.

How mobile solar containers can be transported?

The solar panels' rail system and folding mechanism are fixed on a sturdy floor frame. This configuration makes it simple to transfer the mobile solar containers by trucks, trains, and cargo ships. Foldable, mobile, compact, and modularized. Mobile solar containers can be compactly stored and easily transported to different locations.

How does a Meox 20ft mobile solar container work?

Meox 20ft mobile solar container stores foldable solar panels, providing a convenient way to generate green electricity on the go. When needed, the container is transported to its destination, and the foldable panels are easily unfolded using a rail system that slides them out from the container.

How long does it take to install a solar panel container?

Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel unit for quick installation. Folding solar panel inside the container can be unfolded or stowed in as little as 1h ( the time does not vary for different photovoltaic containers ).
