

# **Bess system for solar factory in Pretoria**

## Overview

---

What is Bess solar photovoltaic (PV)?

The 1440 megawatt-hours (MWh) distributed BESS with 360 megawatt (MW) Solar Photovoltaic (PV) represents a giant leap forward in achieving this aspiration. Q: What is Battery Energy Storage Systems (BESS)?

BESS, or Battery Energy Storage Systems, stores electricity in batteries for on-demand power supply.

What is Bess & how can it help South Africa?

With South Africa facing ongoing electricity challenges, BESS is a crucial technology to improve energy reliability, reduce reliance on Eskom, and accelerate the transition to a sustainable energy future. BESS, Battery Energy Storage System. Advanced solutions that store electricity in rechargeable batteries for later use.

Why do we need a Bess system?

They help balance supply and demand, enhance grid stability, and improve energy efficiency by storing excess power from renewable sources like solar. BESS can reduce energy costs, provide backup power during outages, and support the transition to a cleaner, more sustainable energy future.

Who is Bess & what do we do?

We design and build BESS containers with full engineering sign-off. We supply and install solar plants, inverter, and battery storage systems from 50kW to 2MW, specializing in BESS containerized solutions.
