

# **Black Mountain Lithium Energy Storage Project**

## Overview

---

Chariot Corporation Limited (ASX:CC9) (“Chariot” or the “Company”) today announces that it has revised its strategy for the Black Mountain hard rock lithium project in Wyoming U.S.A. (“Black Mountain”) and will shift from exploring for a large-scale resource to testing the viability of establishing a smaller-scale “pilot mine” at Black Mountain (“Pilot Mine”), with the goal of supplying spodumene concentrate to several lithium hydroxide refineries under construction in the southwestern United States. Where is Black Mountain Energy Storage based?

Black Mountain Energy Storage, based in Austin, Texas, developed a +3GW pipeline of utility-scale storage projects in ERCOT territory. Recurrent Energy, LLC, a wholly owned subsidiary of Canadian Solar Inc., announced the acquisition of two standalone energy storage projects from Black Mountain Energy Storage.

Does Black Mountain have a mineral lease agreement?

Having conducted a comprehensive assessment of mineral resources, Black Mountain is actively seeking mineral lease agreements for our lithium project. We are thrilled to connect with landowners as we embark on our latest frontier in exploration.

What makes Black Mountain a great partner?

Black Mountain has been an exceptional partner to work with and we are excited to throw our development, EPC and financing expertise behind these assets to move them across the finish line, affirming our commitment to developing resilient renewable energy resources throughout Texas.
