

Black Mountain computer room UPS uninterruptible power supply company

Overview

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is key in server rooms and data centres. Why?

It gives backup power during blackouts, keeping vital equipment running. It works fast as light, spots power gaps, and then flips to its battery reserve. This avoids losing data or damaging hardware. What's more?

.

Which is the best uninterruptible power supply manufacturer?

With 20 years of R&D experience in UPS industry, SCU, one of the biggest uninterruptible power supply manufacturers, provides 6KVA to 900KVA UPS products that are highest levels of availability, reliability and efficiency. SCU UPS products cover applications from IT rooms to large data centers and industrial plant and so on.

How does ups work in a server room?

UPS for server room works in three main ways of functioning. Here, the UPS gets its power from the regular power supply. This supply has the right voltage and frequency the UPS needs to work. During the Normal Mode a piece called a rectifier changes AC power to DC power. This powers up an inverter and charges batteries.

Who provides lithium-ion battery UPS for data center solutions?

As a reliable lithium-ion UPS data center solution provider, SCU provided lithium-ion battery ups for data center solutions for a data center in Indonesia. The solution was adopted and successfully implemented, providing important power support and ensuring that servers, Storage and other IT equipment can continue to operate.
