Blown fuse in circuit breaker in London

Overview

Can a professional electrician fix a blown fuse in Your House?

Fixing a blown fuse in your house can be a dangerous affair. A professional electrician can fix your electric issues and bring light back to your home safely. McCarrick Electric has provided Colorado residents with reliable electrical services and advice for over 40 years. We can help you figure out what to do when you blow a fuse in your house.

What happens if a fuse blows?

Fire hazards, broken equipment, and lost power are some possible consequences of a blown fuse. When a fuse blows, your options are: Ensure you have a new fuse with the same breaking capacity, type, amperage, and rating. Following electrical safety practices are also an essential part of learning how to replace a blown fuse.

Why does a fuse blow a breaker?

A fuse is a very important part of your wiring. The fuse will blow or the breaker trip when either:

- The circuit is overloaded so that it is trying to draw too much current.
- There is a fault on the circuit probably creating a short (short circuit) caused possibly by the live touching neutral or earth wires, or possibly a fault on an appliance.

What causes a blown fuse?

This can occur due to wear and tear, rodents chewing through wires, or water damage. Damaged wiring can cause electrical currents to leak away from the circuit, leading to a blown fuse. Regular electrical inspections can help identify damaged wiring, and a qualified electrician can repair or replace damaged wires to prevent further issues.
