

# **Canadian enterprise solar power generation energy storage pump**

## Overview

---

What is Canada's only pumped storage facility?

Canada's only other pumped storage facility is Ontario Power Generation's Sir Adam Beck Pump Generating Station. This 174-megawatt facility pumps water from the Niagara River into a 300-hectare reservoir for energy storage.

What is Ontario pumped storage project?

"The Ontario Pumped Storage Project has the potential to store and deliver clean, affordable energy for decades, representing Canada's largest clean energy storage project. This project can only proceed following this work and the successful approval of Bruce's expansion plans, as this storage is a critical part our larger energy build-out.

When will pumped storage be completed in Canada?

torage project upon completion in 2023. 2.5 Existing Pumped Storage in Canada As pronounced on OPG's website: While the vast bulk of Canada's pumped storage hydroelectricity potential remains untapped, the Sir Adam Beck Pump Generating Statio.

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.
