

# **Castrie solar container lithium battery retrofit inverter**

## Overview

---

What are suvastika retrofit lithium batteries?

Introducing the next generation of power backup: Suvastika Retrofit Lithium Batteries. Say goodbye to outdated technology and hello to extended power, longer life, and worry-free operation. Our revolutionary batteries are compatible with all existing inverters and UPS systems, making them the perfect upgrade for your home or business.

Can you add battery storage to a solar panel?

The good news is that it's entirely possible to add battery storage to an existing solar panel setup. So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options.

How much does a retrofit battery installation cost?

On average, installing a battery storage system costs about \$13,000 before incentives. However, the final price will vary based on the brand of battery, your location, and the complexity of your installation.

Should I replace my solar inverter with a hybrid battery?

For greater efficiency, you can opt to replace your current inverter with a hybrid model and install a DC-coupled battery that shares the inverter with your solar panels. While this is a more expensive option upfront, it reduces energy loss and improves overall system efficiency.
