

# China-Europe Telesolar container communication station Inverter solar Power Generation Tender

## Overview

---

Are solar inverters a threat to Europe's energy sovereignty?

The European Solar Manufacturing Council (ESMC) today issued a clear and urgent warning: Europe's energy sovereignty is at serious risk due to the unregulated and remote control capabilities of PV inverters from high-risk, non-European manufacturers – most notably from China. Study by DNV provides the evidence.

Do Chinese inverters have a firewall?

Although the inverters are designed to allow remote access for updates and maintenance, utilities using Chinese versions usually use firewalls to prevent direct communication with the country.

How many solar power plants are there in Europe?

Currently, more than 200 GW of Europe's solar capacity is connected to inverters made in China, which is equivalent to more than 200 nuclear power plants.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
