

# China solar power to battery in Nepal

## Overview

---

Can solar PV & energy storage solutions transform Nepal's energy sector?

The event took place at the Huawei Exhibition Center in Hattisar, Kathmandu, bringing together over 80 key stakeholders from Nepal's energy, business, and industrial sectors. This program served as a platform to explore the potential of solar PV and energy storage solutions in transforming Nepal's energy sector.

What is solar power in Nepal?

**Solar Power in Nepal:** – Solar energy is radiant light and heat from the sun, which has always been used by humans through a series of constantly evolving technologies. Solar radiation and secondary solar resources make up the bulk of the renewable energy available on Earth.

Is solar energy a viable alternative for power generation in Nepal?

“ Nepal receives optimal sunlight of approximately 300 days on average during the year with a total solar radiation of 3.6 – 6.2 kWh / m<sup>2</sup> / day with an average of 4.7 kWh / m<sup>2</sup> / day, making solar energy a significant renewable alternative for power generation in Nepal.

How can Nepal shape the future of energy?

“Nepal has great opportunities to shape the future of energy. By working together, we can implement sustainable solutions, reduce carbon footprints, and build a smart green energy system,” he said. Ashish Garg, Chairman of the Energy Development Council, stressed the importance of renewable energy in Nepal's industrial sector.

## China solar power to battery in Nepal
