

# **Compact power station factory in Algeria**

## Overview

---

How many power plants are in Algeria?

Algeria has 59 utility-scale power plants in operation, with a total capacity of 15873.8 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

Where is the 750 MW single cycle power plant located?

The 750 MW single-cycle power plant is located in the Blida region, in Algeria. The Plant is a Simple Cycle Plant, equipped with three GE 9FA gas turbines, which will use natural gas as main fuel and fuel oil as secondary fuel, with an annual generation capacity of approximately 4,000 GWh, to supply electricity to more than 1 million homes.

What is Algeria's new solar plant?

Currently under construction in Biskra province, the 300MW solar plant is the first of eleven PV facilities planned under Algeria's Solar 1000 programme, which aims to install 1GW of capacity across the country.

What does the Biskra 300MW solar power plant mean for Algeria?

The launch of the Biskra 300MW Solar Power Plant—the nation's largest photovoltaic (PV) project to date—marks a major step forward in Algeria's renewable energy ambitions.
