

# **Cost of Waterproof Solar-Powered Containers Used at Indian Airports**

## Overview

---

Can solar energy be tapped in Cochin International Airport?

Fig. 1. Prospects for tapping solar PV energy in airport. Cochin International Airport Limited (CIAL) stepped into tapping of solar energy with the commissioning of 1.1 MW solar plant in 2013 and it was the first MW scale solar power plant in Kerala.

Why do Indian airports use solar energy?

Nowadays, airports' interest in solar photovoltaics (PVs) is growing and many Indian based airports now use photovoltaic (PV) solar systems as one of their key energy sources. These systems provide a way to lower the burden of energy costs and to show environmental stewardship by airports (Sreenath et al., 2020a).

What is solar powered Cochin Airport?

Solar powered Cochin airport presents a wonderful opportunity for other airports in India to build such projects towards low emission model. This project also provides an awareness and commitment towards climate changes and carbon emission caused by the airports.

Which airports in India can be fully solar powered?

In India, Delhi international airport, Kolkata international airport and Bhopal airport are running by solar power partially. All most all the airports in India can become fully solar powered airport by utilising the vast and open land left as buffer zones (45–60 acres). This sort of installation can serve as a model for other airports. 6.

## Cost of Waterproof Solar-Powered Containers Used at Indian Airports
