

Cuba small UPS uninterruptible power supply

Overview

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is a device designed to provide backup power when the primary power source fails or when voltage levels drop below acceptable limits. UPS systems are commonly used in computers, server farms, and data centers to ensure uninterrupted operation and protect digital data from power-related disruptions.

What is a Delta ups?

With its wide range of Uninterruptible Power Supplies (UPS), Delta offers a competitive edge to businesses in need of first-rate power solutions. Delta UPSs are designed to ensure that companies can protect their mission critical applications by maintaining a steady flow of energy under adverse circumstances.

Why should you choose delta power supply units?

The Delta line of uninterruptible power supply units includes superb options trusted by leading organizations across a wide array of industries, from financial institutions to medical centers. Small business owners also look to Delta for power solutions that keep their vital equipment running no matter what happens.

What is the best ups for a small business?

With its compact size, sinusoidal output waveform, high efficiency, and reliability, the line-interactive UPS is the most common choice for power capacities between 0.5–5 kVA. The Standby-Ferro UPS (also known as standby ferro-resonant UPS) uses a three-winding transformer to couple the load to the power source.
