

Distance between UPS battery cabinets

Overview

Where should battery back-up cabinets be installed?

In line-ups where battery back-up cabinets may be needed, the footprint location must be ascertained ahead of time because batteries cannot be added easily to side-by-side cabinets when battery back-up cabinets are in the center of a line-up. The battery cabinet must be installed adjacent to the power cabinet.

How to install a UPS battery cabinet?

Make the ground connection at one of the screws on the battery cabinet; to ensure a good connection, remove the paint under the cabinet screw. Do not make the UPS ground connection yet. 3. Place the batteries in the cabinet according to the installation diagram that came with the batteries.

How to store ups without batteries?

The UPS or external battery cabinet without batteries may be stored at - 20° to 60°C (- 4° to 140°F). Ventilation: The air around the UPS must be clean and free of dust, corrosive chemicals, and other contaminants. The air must be free to circulate around the UPS and battery cabinet(s).

How do you install a battery cabinet?

Align the cables on the battery terminals so that the cable lug will not contact any part of the cabinet even if the battery is moved. Keep the cable away from any sharp metal edges. Install the battery cables so they cannot be pinched by the battery cabinet or UPS doors. BATTERY CABINET INSTALLATION
