

# **Distribution of Hydrogen Energy solar Sites in Armenia**

## Overview

---

Who generates electricity in Armenia?

electricity generation. Electrical energy is generated by the Armenian Nuclear Power Plant, Yerevan TPP CJSC, Hrazdan Energy Company, Vorotan HPP Cascade, and Sevan-Hrazdan Cascade, as well as many smaller entities holding licences for the generation of energy through renewable ener.

How big is Armenia's solar power?

In 2017, Tamara Babayan, a sustainable energy expert, estimated the potential of Armenia's distributed solar power at 1,280 MW and almost 1,800 GWh in annual generation.

Is there a solar energy supply in Armenia?

ry energy supply (2019). Nevertheless, it should be noted that over the past three years, international competitions of two large solar stations with a total installed capacity of 255 MW have been succ ssf lly held in Armenia.<sup>14</sup>. Please can you give a summary of the key renewable projects in the pipel.

Is geothermal energy viable in Armenia?

The geothermal energy potential of Armenia is significant, but is not considered economically viable, at least for now. The World Bank has estimated the total potential at around 150 MW. The Karkar site in Syunik, for instance, has an estimated capacity of 28 MW with a construction cost of nearly \$100 million, far pricier than solar.

## Distribution of Hydrogen Energy solar Sites in Armenia
