

Do you sell 220v inverters

Overview

How do I get 220V from a 110 volt inverter?

You would have to get a step-up transformer (perhaps auto-wound for lower costs) to get 220 from a 110 inverter. Re: 220v from two inverters?

Aloha, Can I parallel two of the same MSW inverters @ 110v each and get 220v single phase?

If so, then would I tie the two neutrals together?

Reference my system below. thanks.

Do I need a 240V inverter?

To use these and other 240v-powered accessories, you'll need a 12v to 240v inverter. An inverter takes the 12v DC current provided by your batteries and converts it into 240V AC current which these accessories can use.

Can a 220V inverter be used in series?

Re: 220v from two inverters?

You can put in series (two 120 VAC units into "one" 240 VAC w/ neutral unit), if the units you have have been designed for synchronized operation (I believe, with an external control cable that runs between the two units--such as some Outback units will).
