## Downfall mobile power box

## Overview

---

What is a mobile substation?

Mobile substations are a type of power distribution system that can be transported and installed quickly and easily in different locations. They are used to provide temporary or emergency power supply to areas where the grid is unavailable or has been damaged, such as construction sites, disaster zones, remote areas, or events.

What is a 24pole IP66 power distribution box?

24Pole IP66 Weather protected Customized Lightweight Mobile Power Distribution Box with Overcurrent Protection Distribution Panels are designed to act as the feeder for the smaller spider type boxes of wired for powering large equipment. A variety of input power available including: direct wire feed, 100A pin and sleeve, or cam type devices.

Why should you choose a mobile substation?

**Reliability:** Mobile substations are factory-tested and ready-to-connect units that ensure high-quality and high-performance power supply. They are equipped with state-of-the-art equipment and advanced control, protection, and communication systems that enable local and remote monitoring and control.

Are Mobile substations a cost-effective solution?

**Economy:** Mobile substations are cost-effective solutions that save time and money for customers. They reduce capital expenditure (CAPEX) by avoiding permanent construction costs and land acquisition costs. They also reduce operational expenditure (OPEX) by minimizing maintenance costs and energy losses.
