

# **Dutch solar energy storage inverter research and development**

## Overview

---

What is the solar PV Dutch market?

The solar PV Dutch market is defined as the market of all nationally installed solar PV applications, both roof top and ground mounted systems. A solar PV application consists of modules, a set up box, inverter, mounting system and all installation and electrical control components needed for its management.

Who is Dutch New Energy Research?

Dutch New Energy Research is an independent research agency and supplier of business and market information in the field of solar energy, sustainable heating and energy storage. With our datasets, models and dashboards we help organizations with insights and strategic consultancy.

Why is the Netherlands focusing on solar-PV and energy storage?

The Dutch focus on solar-PV and energy storage In the Netherlands, the high demand for solar-PV systems drives our commitment to ensuring a sufficient and safe supply chain. This extends beyond our robust solar ecosystem, incorporating energy storage as a key component for enhancing efficiency and stabilising the grid through peak shaving.

How can the Dutch solar sector benefit from innovation?

Harnessing the potential of solar energy calls for creativity and innovative strength. The Dutch solar sector has been enabling breakthrough innovations for decades, thanks in part to close collaboration with world-class research institutes and by fostering the next generation of high-tech talent.

## Dutch solar energy storage inverter research and development

---

### Dutch PV Portal

The Dutch PV Portal The Dutch PV Portal has been created to provide publically accessible information on solar energy in the Netherlands, ...
