

# East African energy storage power station investment

## Overview

---

Are energy storage boom times extending to Africa?

Boom times for energy storage have extended to the continent of Africa, with a 10-fold increase in installed storage supporting grids and renewable energy penetration.

What is Africa's energy situation like?

Africa is characterised by strong regional imbalances. South Africa and North Africa account for less than 20% of the population but more than 45% of energy investment and over 65% of installed electrical capacity.

How much energy is invested in Africa?

Over the past decade roughly half of energy investment in Africa has been in oil and gas, primarily made by private companies with a view to export. Meanwhile, spending on clean energy remained relatively flat at less than USD 30 billion per year until 2021.

How much money does Africa need for energy projects?

Public and development finance (DFI) funding for energy projects in Africa has fallen by approximately one-third in the last ten years, reaching USD 20 billion in 2024, largely due to a reduction of more than 85% in spending by Chinese DFIs.
