# East Asia Energy Storage Solar Power Generation

## Overview

---

Should Philippine energy storage systems be regulated?

The Philippines needs to establish clearly defined rules for the market participation of energy storage systems (ESS), the chair of the country's regulator has said. A renewable energy subsidiary of oil & gas company Reservoir Link has agreed to jointly develop the first dispatchable solar PV power plant in Malaysia.

Why did Energy Storage Summit Asia move from Singapore to Manila?

Returning for its third edition in 2025, the Energy Storage Summit Asia relocated from Singapore to Manila, in the Philippines. This shift reflects the country's emergence as a leader in energy storage deployment following the inaugural Green Energy Auction 4- the first auction to integrate Renewable Energy and Energy Storage Systems (IRESS).

What is the Energy Storage Summit?

The Summit connects the most influential investors, developers, policymakers, utilities, and technology providers shaping the future of energy storage. Building upon the success of previous years, our Summit offers a unique platform for professionals to connect, collaborate, and drive innovation.
