

Egypt Science and Technology Industrial Park Energy Storage Project

Overview

Recently, the Kom Ombo 500 MW PV Expansion and 300 MWh Energy Storage Project—Egypt's largest standalone energy storage project, surveyed and designed by the Southwest Electric Power Design Institute Co., Ltd. of China Power Engineering Consulting Group—was put into commercial operation, marking a new stage in Egypt's new energy development. Will Egypt build a solar and battery storage hybrid project?

The energy project will encompass a 1GW solar and 100MW/200MWh battery storage hybrid project, the first of its kind in Egypt. Construction on a solar and battery storage hybrid project in Egypt is set for the first half of 2025.

Could battery storage be a game-changer for Egypt's energy sector?

The integration of battery storage with solar PV is a game-changer for Egypt's energy sector, providing reliable and dispatchable renewable energy and reducing reliance on fossil fuels. It not only meets Egypt's current energy needs but also sets a precedent for future dispatchable hybrid renewable energy projects in the region.”.

How does solar power work in Egypt?

It takes Egypt's green energy transition to another level by harnessing the power of the sun, not just during the day but also at night, thanks to the combination of solar and battery storage. The project addresses the growing demand for electricity and reduces the need to import expensive fossil fuels.

What is Scatec's new integrated power plant?

The integrated power plant will be developed by Scatec, a leading renewable energy solutions provider, and built in two phases. The first phase, with 561 MW of solar and 100 MW/200 MWh of battery storage, aims to start operations in the first half of 2026. The second phase, with 564 MW of solar, aims to start operations in the second half of 2026.
