

# Emergency power supply and container energy storage

## Overview

---

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is an emergency power supply?

An emergency power supply is not a permanent replacement for energy from the public grid. It is merely a temporary backup supply for emergencies. The technology steps in when the primary power supply fails and can compensate for this for a certain period of time, depending on the performance and number of gensets and fuel supplies used.

What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with us.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO4) combined with an intelligent 3-level battery management system (BMS);
