

# Energy Storage Container Solar Works in China Real

## Overview

---

A 500 MW/2,000 MWh standalone battery energy storage system (BESS) in Tongliao, Inner Mongolia, has begun commercial operation following a five-month construction period, reflecting China's accelerating rollout of large-scale storage to firm and integrate high penetrations of wind and solar generation. Where are solar energy storage units located in China?

On a mountain pass in Jiawa village, Qusum county, Shannan, southwest China's Xizang autonomous region, rows of energy storage units hum quietly beside a solar-storage power station. "These facilities are designed to work with photovoltaic power generation.

Will energy storage support solar and wind plants in China?

At least 10 regions in China have ordered renewable power developers to install energy storage as supporting facilities of the solar and wind plants.

Why is energy storage important in China?

[Photo/Ren Yigang] As China accelerates the shift toward renewable energy and builds a new type of power system, energy storage has become indispensable.

How big is China's energy storage capacity?

Since the start of the 14th Five-Year Plan period (2021-2025), China's total installed capacity of new energy storage projects has expanded twentyfold. By the end of June this year, capacity had climbed further to 94.91 million kW/222 million kWh, up about 29 percent from the end of 2024.

## Energy Storage Container Solar Works in China Real

---

China leads the world in new-type energy storage capacity

Sep 12, 2025 · Technicians check equipment at an energy storage station in Yongzhou, central China's Hunan province. [Photo/Lei Zhongxiang] On a mountain pass in Jiawa village, Qusum ...
