

# Energy of Iran Base Station Battery Plant

## Overview

---

Does Iran have a nuclear power plant?

(Updated 2020) PREAMBLE The Islamic Republic of Iran has one operating nuclear power reactor, Bushehr Nuclear Power Plant (BNPP), Unit 1, where a total of 42 199 million kW.h electricity has been generated from March 2011 to March 2020. BNPP-1 provided 1.84% of national electricity production in 2019.

What is Iran's energy policy?

The energy policy of the Islamic Republic of Iran is explained in the National Energy Strategy Document, which sets out policies through 2041. Approved by the Cabinet of Ministers on July 2017, the document outlines a comprehensive set of long term goals and strategies in the country's energy sector.

What is the uranium conversion facility in Isfahan?

The Uranium Conversion Facility in the southeast of Isfahan consists of process lines to convert yellowcake into natural uranium hexafluoride (UF<sub>6</sub>) and natural uranium oxide (UO<sub>2</sub>). A fuel manufacturing plant next to this facility produces pellets, rods and nuclear fuel assemblies.

Who owns the uranium industry in Iran?

Uranium mining and milling The owner of the uranium industry is the Government of the Islamic Republic of Iran, where AEOI is the operator and responsible for uranium exploration, mining and treatment. Uranium ore recovered by open pit mining of the Gachin salt plug has been processed at Bandar Abbas Uranium Production Plant since 2006.
