

Energy storage cabinet communication high voltage box

Overview

This design provides driving circuits for high-voltage relay, communication interfaces, (including RS-485, controller area network (CAN), daisy chain, and Ethernet), an expandable interface to humidity sensor, high-voltage analog-to-digital converter (ADC), and current sensor. Why do I need a high-voltage box / PCs/ups / EMS?

These enable seamless communication with the high-voltage box, PCS/UPS, or EMS, supporting data exchange and control for the energy storage battery management system while ensuring robust system protection. Email us with any questions or inquiries or use our contact data.

What is a bus cabinet?

The bus cabinet serves as the DC-side bus control unit of the energy storage battery system, connecting the high-voltage box and the storage converter. It integrates the power pool system (stack), optional fuses or circuit breakers, a three-level Battery Management System (BMS/ESMU), and a UPS power supply.

What is bsm48106h?

The BSM48106H is a high-voltage energy storage system based on advanced lithium iron phosphate (LiFePO₄) battery technology. Developed and produced by Bluesun, it provides reliable power support for a wide range of equipment and systems.

What is bsm48106h battery management system?

The BSM48106H features a three-level Battery Management System (BMS) that monitors and manages critical cell information, including voltage, current, and temperature. Additionally, the BMS balances charging and discharging processes to enhance cycle life.
