

# Energy storage equipment PACK

## Overview

---

What is energy storage system products list?

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.

What is the Energypack and how do I use it?

The Energypack is a backpack that can store energy and recharge held electric tools. It is power tier 3 (it can only be charged in an MFE or MFSU) and can hold up to 2 million EU. To use the Energypack, it must be charged and equipped in the chestplate armor slot.

Which energy storage series products have full-stack coverage?

The energy storage series products of SVOLT achieved full-category coverage, providing a full-stack solution for cells, PACK, systems, and intelligent applications. Advanced staking process is adopted for SVOLT products and all series products have undergone penetration test to ensure safety.

What are the applications of energy storage system?

The energy storage system can achieve applications such as solar energy storage integration, energy transfer, primary frequency regulation, secondary frequency regulation, reactive power support, short-circuit capacity, black start, virtual inertia, damping, etc. in conjunction with photovoltaic power generation.
